IN THE CLAIMS:

Please amend the Claims as follows:

1. (Amended) A total knee prosthesis capable of providing resurfacing to the adjacent ends of the existing bone structures, as well as total posterior stabilization to the knee joint, comprising:

a) a femoral component including:

i) a medial condyle having an anterior portion, a distal portion and a posterior portion;

ii) a lateral condyle having an anterior portion, a distal portion and a posterior portion;

iii) an anterior ^{patellar} ~~patella~~ flange interconnecting the anterior portions of the medial and lateral condyles in parallel, spaced apart relation; and
